

Junior Software Developer

Job description

We are looking for a curious and motivated **Junior Software Developer** to join our team. This is a fresher-friendly role where you will work on exciting software development projects. You will collaborate with senior developers on development, testing, and deployment tasks. Knowledge of AI concepts is an added advantage but not mandatory.

If you are a fresh graduate eager to kickstart your career in software development and have an interest in emerging technologies including AI, this role is for you!

Profile of the ideal candidate

The ideal candidate would have:

- 0 to 1 years of relevant work experience
- Bachelor's or master's degree in computer science, Information Technology, Data Science/Artificial Intelligence or Software Engineering.
- Basic programming knowledge in Python, JavaScript, or any other programming language
- Basic understanding of AI concepts like Machine Learning, Prompt Engineering, or RAG architecture (good to have)
- Exposure to AI tools or frameworks like LangChain, OpenAI APIs, or Hugging Face (added advantage)
- Interest in AI Agents, chatbots, or automation tools (good to have)
- Good analytical and problem-solving skills with logical thinking ability
- Willingness to learn and collaborate with team members
- Proficient in English (spoken and written).
- Maintain confident and presentable body language.
- Understands client needs and aligns work to their goals
- No 9 to 5 mentality
