Junior UI Developer

Job description

Experience: 0-2 years

We are looking for a curious, motivated, and energetic Junior UI Developer (HTML/CSS) to join our growing team. This role is ideal for professionals who have hands-on experience who are passionate about building visually appealing, responsive, and user-friendly web interfaces.

As a Junior UI Developer, you will work closely with the Graphics/Design team to transform visual designs into high-quality front-end code. You will collaborate with the Software Development team to integrate UI components and coordinate with the Software Testing team to ensure consistency, usability, and cross-browser compatibility.

If you enjoy front-end development, have an eye for detail, and are eager to grow your skills while exploring emerging technologies including AI, this role is for you.

Key Responsibilities

- Develop and maintain web pages using **HTML5 and CSS3**
- Convert UI/UX designs into clean, responsive, and reusable code
- Use **Bootstrap** or similar frameworks to build responsive layouts
- Apply basic **SASS/SCSS** for structured and maintainable styling
- Ensure UI compatibility across multiple browsers and devices
- Collaborate with designers, developers, and testers to deliver high-quality UI
- Perform basic UI testing before handing over to the QA team
- Fix UI-related bugs and implement enhancements
- Follow coding standards and project guidelines provided by senior developers
- Complete assigned tasks within agreed timelines

Profile of the Ideal Candidate

The ideal candidate would have:

- **0 to 2 years of relevant work experience** in UI / Front-end or Web Development
- Bachelor's or Master's degree in Computer Science, Information Technology, Data Science / Artificial Intelligence, or Software Engineering
- Successful completion of **training, certification, or internship in Web/UI development**
- **Hands-on knowledge of HTML5 and CSS3**
- Strong understanding of **responsive web design and cross-browser compatibility principles**
- Familiarity with modern CSS frameworks such as **Bootstrap** (mandatory) and **Tailwind CSS** (good to have)
- Basic awareness of **SASS / SCSS** for writing maintainable and scalable styles
- Basic knowledge of **JavaScript** and **jQuery** to support UI interactivity (added advantage)
- Willingness and ability to learn new technologies and tools quickly
- Strong analytical and problem-solving skills

- Excellent **communication and collaboration skills** in a team environment
- Ability to **participate in the design, development, testing, and maintenance** of software applications
- Experience or interest in **working closely with cross-functional teams and business stakeholders** to understand requirements and deliver aligned solutions
- **Flexible mindset**, with no rigid 9-to-5 mentality, and willingness to support delivery needs when required

Added Advantage

- Exposure to UI frameworks or libraries
- Interest or basic understanding of **AI or emerging technologies**
- Experience working in Agile or team-based environments
- Web development certifications – added advantage

The Ideal Candidate would be:

- Hardworking and committed
- Initiative taking
- Self-motivated
- Quick learner
- Proactive
- Result-oriented
- Capable of sound decision-making
- Committed to meeting tasks and deadline

The compensation package

- a competitive compensation package
- a dynamic and challenging job in an open and collaborative work environment
- fast-track, on-the-job training
- opportunity to grow with the company
- exposure to work with international customers
- front seat ride in the roller coaster of cutting-edge technologies in a fast-evolving ecosystem

Job location

Bangalore, (Karnataka, India)
